Fairtrade Premium use reporting

Dear Fairtrade partners,

We are happy to inform you that the FairInsight online platform is now operational. Please find the link to the FairInsight platform which will be accessible as of the **1st October 2021** here (<https://fairinsight.agunity.com>). This link is also available in requirement 4.1.10 of our Fairtrade Standard for Small-scale Producer Organizations (SPO).

With the launch of this platform, requirement 4.1.10 in the SPO Standard will be applicable from **1st October 1st 2021** starting with the next regular General Assembly of your organization.

Producer Organisations will receive a training through their respective Producer Networks within the 3 months after their General Assemblies on how and when to send the premium reports. These trainings will enable Producer Organisations to report their implemented premium investments of the previous year with actual results, as well as their investment plan for next year after the approval of General Assembly. During the trainings Producer Organizations will also be trained on how to share their investment plans and results by exporting or printing, to associate digital assets (photos and videos) to their investments. Please contact to your respective Producer Network representatives in case you have any questions regarding the trainings.

If you have any questions regarding this announcement or the Fairtrade Standard for Small-scale Producer Organizations in general, please feel free to contact Jebet Yegon at j.yegon@fairtrade.net

Best regards,

Gudrun Schloepker
